Supplementary information (cont.)

The presented data are based on the assumption that the observed effects are due to the intervention. However, the reported results may be influenced by various confounding factors, which could affect the interpretation of the data. Further studies are necessary to confirm these findings and to determine the underlying mechanisms responsible for the observed effects. Despite these limitations, the presented data provide a valuable insight into the potential benefits of the intervention and suggest directions for future research.

Table 2: Example Table

<table>
<thead>
<tr>
<th>Group</th>
<th>Mean Value</th>
<th>Standard Deviation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>10</td>
<td>2.3</td>
</tr>
<tr>
<td>B</td>
<td>12</td>
<td>1.5</td>
</tr>
<tr>
<td>C</td>
<td>15</td>
<td>1.8</td>
</tr>
</tbody>
</table>

Figure 1: Example Figure

The figure illustrates the relationship between the two variables. As the variable X increases, the variable Y also increases, indicating a positive correlation. Further analysis is needed to establish the nature and strength of this relationship.
